**Should there only be one way to submit manuscripts?**

Not! We don't think so, either. That's why we've developed **Editorial Manager® Ingest** to save time and add value to submission workflows for the thousands of journals using EM.

**OPTION 1: Allow authors directly to ingest**

**OPTION 2: Author uploads via a Submission Partner**

Submission Partner: **em**

Benefits of Ingest:

- Faster submission process
- Single access point
- Reduced manual errors
- Greater metadata capture
- Collaborative workflow

Editorial Manager's partnerships with emerging author services and tools provide **real** integration by ingesting files and metadata.

**Submission Partners**

**edmgr** **Overleaf** **PubPub** **bioRxiv** **chronos**

and publisher branded submission portals.
